WIRELESS PACIFIC[™]

A COSTLY HISTORY...

Since the creation of the first mobile two way radio, system designers and radio manufacturers have grappled with solutions to enhance user mobility when away from the vehicle. These solutions typically involved additional portable hand-held radios and significant additions of base station infrastructure; radio sites and complex remote receiver voting systems to back fill marginal coverage areas. Alternatively, some manufacturers developed cumbersome vehicle based mobile repeater systems where simplex portable transmissions are repeated through a mobile repeater back into the base station network. These systems required careful engineering, additional frequencies and critically complex contention management protocols to eliminate clashing from multiple vehicle repeaters at scene. Vehicle repeaters usually added system delays and required user intervention for managing which channels, mode or status to use in order to make them work. Both solutions came at a cost... a big cost!

TIME TO GET LIBERATED!

- **TALK IN OR OUT OF THE VEHICLE**
- **EXCEPTIONAL CLEAR AUDIO**
- **SIMPLE INTUITIVE DESIGN**
- **MINIMAL USER TRAINING**
- **IP55 WEATHERPROOF MIC**
- **SEAMLESS INTEGRATION**
- **LIGHTWEIGHT & RUGGED**
- **PATENTED INNOVATION**
- **ALL DAY OPERATION**
- **ENCRYPTED VOICE**
- **HEADSET PORT**
- **COST EFFECTIVE**
- **RELIABLE**

SECURE WIRELESS COMMUNICATION via your vehicle's mobile radio

YOUR
MOBILE

up to 350 meters from your vehicle...

Teams Remain Productive In Remote Work Environments

The vehicle mounted mobile radio is often the first responders' chief communication link to central command and other radio units. However, when an officer needs to go back and wait at the vehicle, to provide or receive an update, operations slow or at worst, come to a stand still, losing critical response time and placing lives at risk. X10DR is revolutionary technology, which allows field operatives to stay in constant communication with each other locally on-site or back to base, via their vehicle mounted mobile radio, up to hundreds of meters from the vehicle.

Duress Alarm

The X10DR secure wireless microphone naturally provide a duress button that can be used to activate the emergency mode within the host mobile radio. Field personnel can now call for assistance even while hundreds of meters from their vehicle.

Headset/ Personal Audio Accessory Operation

Classic models include a Hirose® audio port on the base of each secure microphone that allows use of a wide variety of specialist and everyday headsets and audio accessories. Additionally, a mono 3.5mm headphone jack provides a simple, easy and effective way to maintain quiet secured private communications. (See X10DR Accessory brochure for more details).

Long Battery Life

The X10DR's 1450mAH internal battery means you will typically achieve well in excess of 24 hours operation between recharges. Docking the microphone into its cradle allows 100% recharge from completely flat in less than 4 hours or for a quick top up during a rest break. For situations where charging in the vehicle is not desired, a single and six way desktop charger are also available.

Common Operation

The X10DR Classic model is configured to operationally functionally to the original X10DR-XU1 units. They are ideal when you want to minimise user training and wish to keep additional units added to your fleet, functionally identical to the existing deployed units. While functionally equivalent you should not the Classic X10DR ,microphone cannot be paired with a 1st generation x10DR X-Ponder unit. Classic Secure Microphones cannot be charged in the new generation single and 6 way chargers also.

X10DR-XU2
package includes:

XMPA "Sharkfin"
multipolarity
roof/rack mount
antenna kit

XIC-1.5 1.5m
Interface Cable

Use with radio
specific adaptor
(order separately)

WE NEVER LOSE SIGHT THAT THE RIGHT RADIO COMMUNICATIONS SOLUTION IS ABSOLUTELY VITAL IN SECURING YOUR ORGANIZATIONAL OBJECTIVES.

WE CONSTANTLY FOCUS ON HOW TO DELIVER A BETTER WIRELESS SOLUTION. WIRELESS SPECIFIC SOLUTIONS THAT DELIVER TRUE EFFECTIVE OPERATIONAL RESPONSIVENESS WITH UNCOMPROMISING SAFETY.
