

The RFI Uploader Program (RUP-001) is a firmware update manager program suitable for use with supported RFI products. The RFI Uploader program allows a fleet of multiple units to be conveniently managed when IP connectivity and current firmware revision status needs to be confirmed, and when firmware is to be upgraded.

A limited functionality “trial” version of program is available at no charge from RFI, and is shipped with supported products. A licence serial number for full-featured activation of the trial version is available for purchase from RFI.

**Features:**

- IP connectivity and its status can be tested and verified
- Units' current firmware revision status can be retrieved
- Firmware upgrades can be automatically uploaded to units
- Upgrades can be performed on-demand, or at a scheduled time/date

**Specifications**
